As a clinician and hospital administrator, do you struggle to meet your patient’s needs because you’re bogged down with documentation?

Are you concerned about accessing accurate and timely billing automation?

Or dealing with materials management that should be built into workflows?

Does the thought of working with cumbersome computing platforms frustrate you?

Are you able to share critical data with other clinicians you work with?

TAKING CHARGE OF YOUR PATIENT CARE

37D, a modern solution that puts all your patient’s needs at the heart of your healthcare goals.

These challenges aren't simple to address and they interfere with all clinicians’ and hospital administrators’ tasks to conduct or do their work effectively. Patients may feel neglected and annoyed; resulting in diminished reputation for the healthcare provider.

Reclaim your healthcare goals with 37D

37D is an intelligent, adaptable, reliable, and secure cloud-based platform that aligns the clinician efforts back towards fulfilling patient’s needs. It is a product of a comprehensive survey of the needs of clinicians, nurses, pharmacists and hospital staff from more than 10 hospitals to determine the most important and urgent user requirements. In essence, 37D is designed by clinicians, nurses, pharmacists and hospitals with hospital professionals in mind.
Why should you consider 37D

REAL-TIME INTELLIGENCE AT YOUR FINGERTIPS
Gain insights to favourite lists, checklists, work lists and pick lists to improve user experience and productivity. The built-in role-based access control enhances security and relieves users from information and functionality overload.

EASE OF USE AND VISUALLY PLEASING
Fast, easy-to-use and intuitive user interface for accessing critical patient-related information. The role-based design enhances the electronic health records adoption rate, boosts overall user satisfaction and ensures a low rate of rejection of use.

COST EFFECTIVE
As a cloud-based solution, 37D consolidates cost and removes complexity of managing your own servers. There are no more server maintenance or unpredictable capital expenditure planning costs, as our team monitors and manages it for you. You scale as you go, only pay as you use and you receive software updates at no extra costs.

POWERFUL, FLEXIBLE AND SCALABLE
The platform scales easily and efficiently to meet your needs as they grow and expand. Our electronic health record is completely scalable, from one site to multiple sites as needed.

MODERN ARCHITECTURE
37D is based on an open architecture to effortlessly communicate and transmit critical data to other systems. This reduces human error and eliminates the need to re-enter data. It can be deployed according to client requirements. It supports multi-device platforms and mobility on-the-go to ensure clinicians have what they need to work more efficiently and effectively.

SECURE
Built on industry-grade practices and adheres to prevailing healthcare cyber security standards.
